Inflation rate for January increased to 23.5%

Ghana's inflation rate increased for the first time since July 2023. Inflation for the month of January 2024 increased marginally by 0.3 percentage points from 23.2% in December 2023 to 23.5%.

The Ghana Statistical Service (GSS) attributed it to the increase in non-food inflation drivers, mainly accommodation, electricity, and clothing.

Our Take: Should this trend continue, it could reduce the likelihood of a Central Bank rate cut in the upcoming month and potentially impact interest rates on the primary market.

CONCLUSION / RECOMMENDATION

Despite the strong demand for GOG Treasury bills, we do not expect the government to meet its upcoming auction target of GH¢ 6,268.00 million on Friday.

We recommend investors subscribe to the 364-day T-bill.
